Spreadsheets/MatrixWriters - Mozilla Firefox

file:///E:/hpcalc-archived/hpcalc19971203/apps/matrix/default.htm

Spreadsheets/MatrixWriters

The first size listed is the file size; the second size listed is the size of the program on the HP.

AIO48 2.2 7KB/5KB	AIO48 provides a symbolic object viewer and a simple writer/editor for symbolic matrices and vectors (represented by lists of symbolics), as handled for instance by the ALG48 library. By Claude-Nicolas Fiechter . Home Page
Array 2.1 5KB/3KB	Array 2.1 is a set of matrix utilities and is useful for column and row manipulation. By Daniel Lopez Sancho.
EXAL 6.1 15KB/15KB	EXAL is an excellent spreadsheet program for both the G and the S series. By Al Arduengo .
EXAL 5.03 59KB/17KB	EXAL is an excellent spreadsheet program for both the G and the S series. This old version is included because it has the source code. By Al Arduengo .
MATRIX v1.2 114KB/13KB	MATRIX is a matrix writer replacement. By Arnold Moy . Home Page
SMW 0.1b	This is a symbolic matrix writer that will allow you to edit and view symbolic matrixes quickly

HP48 Numerical Math Programs - Mozilla Firefox

file:///E:/hpcalc-archived/hpcalc19990201/math/numeric/default.htm

hpcalc.org
hp48 archive

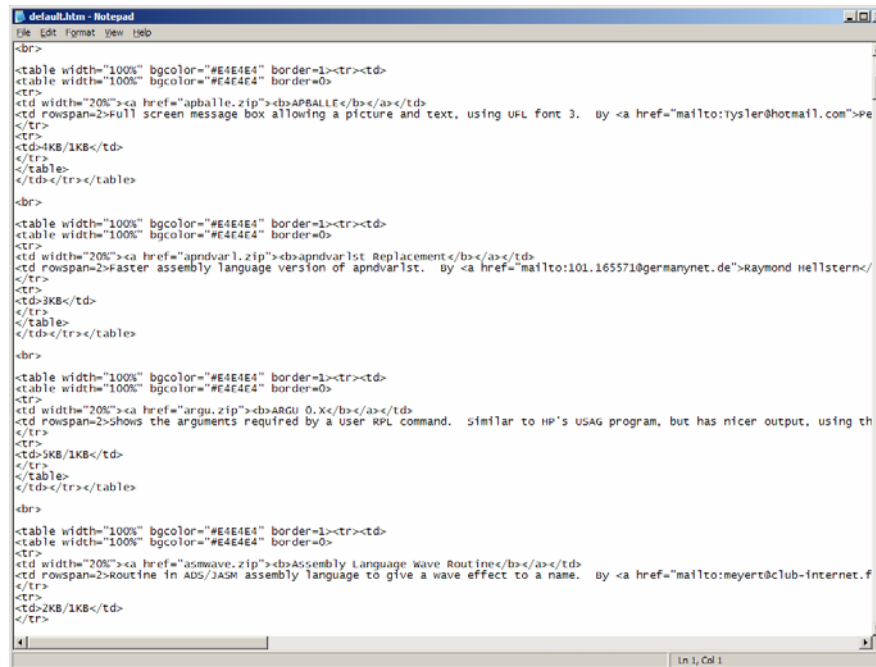

HP48 Numerical Math Programs

The first size listed is the file size; the second size listed is the size of the program on the HP.

Angle3 1KB/1KB	Angle between 2 vectors using the "DOT PRODUCT." By Eric Barger .
CMAT 5KB/1KB	CMAT is an HP48 program for performing operations on columns of a matrix. CMAT iterates over each row of the matrix, treating the n columns of the matrix as if they were variables named C1, C2, ... Cn, or, optionally, as if they were named with user-specified names. By Wes Hubert.
DEQ 2KB/1KB	Differential Equation Solver. By Jorge Costa . Home Page
EEX 1KB/1KB	Works with numbers in scientific notation. By Daniel Cohen-Laroque .
EqDiff 2.5 3KB/5KB	D'Adams integration method.

1KB/1KB

The smallest and best program to toggle between different font sizes.

By Wolfgang Rautenberg ([H](#)) ([U](#)).

2000/05/27

[GVIEW](#) (details) [U](#) [D](#)

1KB/1KB

Searches all files containing graphics in the current directory and displays them one after another with the NXT-key. The menu area displays additional information on Size and name. The Arrow-Keys scroll the graphics whose right lower boarder is marked. ENTER leaves the present graphic on the stack.

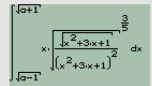

By Wolfgang Rautenberg ([H](#)) ([U](#)).

2003/12/28

[HeadMan 5.2004](#) (details) [U](#) [D](#)

26KB/2KB

A tool for using the new header of the HP49G+ or to integrate it into the display for various environments (Stack, EQW etc). Its viewer uses the entire screen and scrolls nicer than the standard VIEW. In minifont 12 stack levels are visible.

By Jorge Cevallos M. ([U](#)) and Wolfgang Rautenberg ([H](#)) ([U](#)).
