

I N D E X

This Handbook is intended to be used as a basic resource for HP-65 Users Club members. This information, especially the membership list, should be held in confidence. Many of our members are very busy people with heavy business or Governmental responsibilities. Individual contact among the membership is encouraged, and this list is one of the advantages of being a member, however you must respect the privacy of your fellow users. Keep the contents of this handbook confidential and for your own use. As you scan the pages, 3-37, you will notice a number of blanks. Those of you who haven't provided your interests are missing the opportunity of finding others with similar interests. Forward this information on a postcard for inclusion in the next printing. On page 45 is information on a new clubhouse. If you are in the greater Los Angeles area during your vacation, business trip, etc. call and I will try to arrange a visit. Full operation in the club house will take time and can only start June 15, 1977. Moving is expected to take a few weeks. The club mailing address does not change! The index below will help in locating the information in this Handbook. Your comments, changes, additions, and suggestions are needed. A special thanks to Rex Shudde (143) for data entry and computer run of parts II & III of this Handbook.

Richard J. Nelson

I. Official Membership List to 2114 (pages 3-37)

No.	Page	No.	Page	No.	Page	No.	Page

CLUB HOUSE

The HP-65 Users Club requires space for members to work, store records, etc. Starting June 15, 1977 space will be rented at 2220 S. Anne Street, Santa Ana, California 92704. Envelope stuffing parties, computer data entry, and other activities will take place at the club house. The club library, museum, and hot line will also be located at the Club House. Full operation of the Club House is expected by late July. Members in the area should call to visit or work. (714) 557-6614, Richard Nelson. In the future, full time office staff will be able to open the Club House regular hours. Consult 65 Notes for details as these changes are implemented. The map below provides directions for getting to the building. We rent space from Applied Electro Technology and use the front right half of the building. The Club House is located about one hours drive from Los Angeles International Airport and about ten minutes from Orange County Airport. Transportation in California requires automobile travel because of the lack of public transportation. The map below shows the location. Main Freeway is the San Diego Freeway, 405.

Club Hot Line telephone number is (714) 549-4159.

S E R V I C E S / P R O J E C T S

The HP-65 Users Club engages in any activity that benefits the membership in using Hewlett-Packard personal programmable calculators. The Club publishes a monthly, irregular, newsletter called 65 Notes. Back issues are available on a continuing reprint basis and may be ordered at any time. Consult 65 NOTES issues for January, May, or September for the box found on page three which lists the contents and groupings of the issues. Club purchases may range from calculators to books and are limited to providing a service to the membership, or raise funds to maintain Club House facilities. The HP-65 Users Club acts as a focal point for calculator information and is a resource for club members to obtain information on all topics related to calculator useage. Much information is not published in 65 Notes and can be requested from the club if it is in the files. Copy time and retrieval time available, staff wise, is one limiting factor. As the club grows a full time staff will allow regular requests to be full filled.

Share A Program was started by Doug Chapman and is a data base of programs written by members who are willing to provide copies to other members who request them. The data base is up-dated as often as personnel are available to key the entries from the special form sent in by members. Any one who can spend a few hours at the terminal is welcome so that more up dates can be made. The data base maintains listings for all machines.

Local Chapters are started by members who identify with each other and select an area descriptive name. Members who wish to start a chapter may use the zip code list in this Handbook to locate members in their area. Future additions of the Handbook will include extensive information on this subject to act as an idea resource for people who want to get involved in face to face meetings. Some chapters actually have a small news letter of their own. Chapters may be as few as four people or as many as 400 people.

Affiliated Clubs. If you are a member of a computer club or other related group and some affiliation to the HP-65 Users Club is mutually beneficial write to the Editor of 65 Notes to work out activities.

The HP-65 Users Club is a non-profit group and all activity is done by the membership. If you have an idea or project you want to work on the club may be a means to obtain assistance in doing your own thing. The purpose of the club is to provide some structure and organization, but is essentially individual or small group activities oriented. Any member may suggest a project and receive help where possible through the resources of the club as a whole.

PUBLISHING ARTICLES OR PROGRAMS IN 65 NOTES

All published material in 65 Notes comes from the membership. Material that is published elsewhere is usually not published or duplicated in 65 Notes. Members who have information of any nature should send it to the Editor. Because of the often complex nature of the highly technical material published in the newsletter it is very desirable that the author prepare the material himself if at all possible. This saves time for the editor and allows more material to be published each issue. The preparation of material should follow the guidelines below.

Type the text if at all possible. Use a clean dark ribbon. If you are not a very good typist try and edit your poorly typed material. Even in this form it is easier to retype.

Space the text typing $5\frac{1}{2}$ " wide columns. Draw two parallel light blue pencil lines $5\frac{1}{2}$ " apart on the paper if it will help. A paper cutter will be used to cut down the lines so any characters that exceed the column width MUST be cut off. Single space the text. If you must use a very wide table, etc. make two columns wide and type on legal size paper so that the total width in this case is $11\frac{1}{2}$ ". You can use the full width of a standard $8\frac{1}{2} \times 11$ " paper if you have to.

Drawings should be dark. You should use a black ink pen, felt tip marker or other suitable black on white. Draw in pencil first. Again keep in the column width of $5\frac{1}{2}$ ". The length is not restricted.

Copyright is retained in your name and you do not give the club exclusive rights to the material. Material you do send in should be done so with the idea that the club will use it to help all the members. If you send in material that has restrictions be sure to attach a note describing these restrictions. If the material you send in is accepted by some other publication be sure to let the editor know so a copyright isn't violated. An article may be printed some time after sent in. A routine or program may be used in a club brochure or even appear on the envelope used to mail out 65 Notes (in this case at least 10 times the circulation is obtained).

Programs are preferred to be typed or hand printed on the club standard program form to conserve newsletter space. Request these forms if needed. If you can handle the full size version (14×22 ") these can be provided as well. Otherwise the four part $8\frac{1}{2} \times 11$ " size will be sent. There is instructions on the forms. See back issues of 65 Notes to visualize how the form is reconstructed to be reduced by a copy camera.

Responding to column editors. If you send your material to a column editor because it is the type of material a particular editor covers in his column it is a good idea to copy the Editor of 65 Notes as well. In some cases the column editor won't use the material, but the Editor will because it fits with other material in a given issue of the newsletter.
